

INCubatoredu Teacher Training

2024 - 2025

Throughout the hands-on training, teachers experience the same pathway as students: they ideate, develop, and iterate their own product or service startup, which they pitch to professionals. Real entrepreneurs and business experts serve as volunteer coaches and mentors guiding teacher teams through the processes of developing hypotheses about a business concept, testing those hypotheses, adapting, and continually learning and improving. The training also includes teaching and role-playing opportunities, so teachers can practice instruction in a safe environment. Teachers end the training with a portfolio of startup business artifacts, a collection of entrepreneurial skills highly valued in all industries, and a collection of tools to bring this class to life in their school.
