

BRING ENGAGING ENTREPRENEURSHIP

to your students

**Curriculum and professional development
to provide true student engagement
in a learn-by-doing, real-world setting**

"It's different in the sense that I wanted to be there."

INC STUDENT

65% of current high school students want more demanding and interesting courses offered to them.

NATIONAL GOVERNORS ASSOCIATION

72% of Gen Z high school students want to start a business someday. They are motivated and willing to work to achieve their dreams.

MILLENNIAL BRANDING AND INSIGHTS

Students are learning and applying industry-relevant practices and business concepts to projects they care about, and get comfortable learning from failure. They build, test, learn, apply – embracing the cycle of experimentation, which is core to entrepreneurship and great training ground for life. Working in teams and being supported by a dynamic mix of teachers, coaches, and mentors, all translates to deeper learning and skill building.

THE STUDENT EXPERIENCE IS:

Authentic | Students learn and practice industry based skills, in a real world environment

Experiential | Hands-on deeper learning, not simulation

Connected | To community and "the what" & "the why" they are learning

how we support schools

- ☒ **Curriculum** | Comprehensive resources including: lesson plans, activities, and assessments
- ☒ **Professional Development** | Robust and ongoing training delivered in a learn by doing format
- ☒ **Community Connection Resources** | Consultation and materials to build your community relationships with a program centric approach
- ☒ **Current Industry Practices** | Integrated into curriculum and training
